## Choose the most energy-efficient motor available for evaporators.

The EC motor is an energy efficient option on Chandler Low Velocity Center Mount Unit Coolers. Available on all new equipment or as an easy-to-install, drop-in replacement aftermarket part from InterLink™ Commercial Refrigeration Parts. Because they are a drop-in replacement for existing shaded pole and PSC motors, installation is quick and easy. It's a high impact, quick payback solution for reducing costs and achieving green initiatives without replacing the entire system.

EC motors by InterLink are up to 75% energy efficient - that's a 51-59% increase over shaded pole motors and a 30-35% increase over permanent-split capacitor (PSC) motors. With all of this added efficiency, you can count on more energy savings and lower operational costs while taking a step in the right direction toward conserving our planet's resources.

## Nomenclature

HW	100	A	G	C
Model Series	Capacity	Electrical Code	Control Option	Design Revision
HWA= Larkin Low Velocity Center Mount, air defrost	# BTUH x 100 (R-404A)	A = 115/1/60	G = intelliGen™	
HWE= Larkin Low Velocity Center Mount, electric defrost		B = 208-230/1/60		
HWG= Larkin Low Velocity Center Mount, hot gas defrost		M = 460/1/60		
		AE = 115/1/60 (EC)		
		BE = 208-230/1/60 (EC)		

# Features & Benefits

## Cabinet

- Low height makes it ideal for low ceiling coolers - larger models are only 15 inches tall, allowing for maximum headroom and more product storage
- Unit designed to be mounted flush against the ceiling or suspended on rods
- Heavy gauge grained aluminum cabinet cleans easily and looks attractive
- Stainless steel screws prevent rust streaks
- Liquid line solenoid wire harness is factory-installed for quick installation
- Wire fan guards with PVC coating for durability
- All electrical components factory wired to terminal board and identified, making it easy to field wire the unit
- Cabinet design features access panels on each end for easy access to electrical and refrigeration components
- Fan panel is lightweight and can easily be lowered for easy servicing and installation
- Expansion valve mounts inside the cabinet

## Coil

- Sweat connections to reduce potential for leaks
- Coils are dehydrated and sealed at the factory
- Internally enhanced tubing and fin design for higher efficiency
- Electric defrost models incorporate high quality tubular heaters and a standard fixed defrost termination thermostat
- Hot gas defrost models come with a shipped-loose adjustable fan delay and defrost termination thermostat

## Drain Pan

- Double drain pan eliminates drain pan sweating

## Motors

- Motor rail is design for maximum strength and durability
- Motors are life lubricated and thermal overload protected
- EC Motors available factory-installed or as a drop-in replacement through InterLink™ Commercial Refrigeration Parts in 115/1/60, 208-230/1/60
- PSC Motors are available in 460/1/60 for air and electric defrost

## Controls Options

- IntelliGen™ Refrigeration Controller (IRC) units come with factory mounted, tested and calibrated with an electronic expansion valve, pressure transducer, temperature sensors, control board and User Interface. Standard features include Door Sensor, Product Load Input and Alarm Output.
- Optional Field installable IntelliGen Webserver Card (iWC) enables local and remote monitoring on any Phone, Tablet or PC.
- Optional Field installable IntelliGen Integration Card (iIC) enables connectivity to BACnet and Modbus.
- Quick Response Controller units come factory mounted with an electronic expansion valve, pressure transducer, temperature sensors and control board.
- Beacon II™ units come factory mounted with an electronic expansion valve, pressure transducer, temperature sensors and control board.

## Other Options

- Factory installed mounted components are available in these configurations:
  - Pre-assembled units come with mounted TXV, liquid line solenoid valve and room thermostat
  - Pre-charged units come with mounted TXV, liquid line solenoid valve, room thermostat, and quick connect fittings
  - Mounted TXV
  - Mounted TXV and solenoid valve
  - Mounted room thermostat
- Most models available with glycol circuiting (see glycol product brochure)
- Units available with stainless steel housing and drain pan
- Units available with copper fins. Air defrost units available with polyester coated fins, or various coil coating options

<sup>†</sup> For EC motors, use 60 Hz capacity and airflow values (Units with EC motors operating at 50 Hz will not see a reduction in performance due to the electronic control of the motor)

## Optional Liquid Line Bypass Kit For Hot Gas Defrost

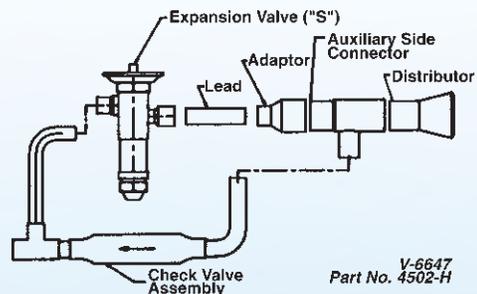

The HWG may be field piped for hot gas defrost using the optional bypass kit.

When compressor vapor, in reverse cycle defrosting, is directed back into the evaporator at the suction connection, it condenses into liquid. The field-installed liquid line bypass kit directs the condensed liquid around the thermostatic expansion valve and back into the liquid line.

Bypass kits include bypass piping, check valve and instructions. Adjustable fan control is shipped loose with hot gas units.

## TXV Bypass Kits (Hot Gas Only)

## Replacement Parts

Right source. Right parts. Right now.

InterLink™ is your link to a complete line of dependable and certified commercial refrigeration parts, accessories and innovative electronic controls for all Chandler equipment. At InterLink, we provide our wholesalers with a comprehensive selection of product solutions and innovative technologies for the installed customer base. And every product is built to ensure the same high performance standards with which all Heatcraft Refrigeration Products (HRP) brands are built — backed by a dedicated team to serve every customer need, delivering at the best lead times in the industry.

Dependable. Versatile. Courteous.

Finally, one simple source for all your replacement needs from a name you can trust.

For parts, please contact (800) 686-7278 or visit [www.heatcraftprd.com](http://www.heatcraftprd.com).

**NOTE:** Nozzles sized for 90-100°F liquid temperature at expansion valve. Contact Application Engineering for guidance if

- Liquid temperature is not 90-100°F
- Evaporator TD is not 10°-15°F (room temperature – saturated suction temperature)
- Electric defrost and hot gas models with a saturated suction temperature of 10°F or higher

**Caution:** Refrigeration system will not perform properly without correct nozzle!

\*R-22 Nozzles for informational purposes only. Not included with stocking evaporators
