FEATURES & BENEFITS - HWN & ZWN

Construction

- Component location and unit size are all optimized for easy field replacements or new installations where space is limited.
- Extra space is provided inside the electrical box for service and installation of additional components.
- Copeland® hermetic and scroll compressors for low and medium temperature operation.
- All units are provided with a water regulating valve for superior head pressure control.
- An extra capacity receiver with liquid shut-off valve is provided for installations with long refrigerant lines.
- A pumpdown switch is provided on all models for field servicing.

Serviceability

- Easy access to the large electrical panel for service diagnostics or options.
- Color-coded wire harnesses are all labeled and coded for easy identification.
- A suction line rotolock service valve is provided on the compressor for service.
- An additional shut off valve is mounted in the discharge line of the compressor for quick and easy isolation of the compressor for service.
- Schrader® valves permit recovery of refrigerant isolated in compressor for quick and easy compressor change if ever needed.

Quality

- Piping is laid out to minimize stress and vibration for quieter operation.
- Easy to verify leak-free unit by checking for the nitrogen holding charge Schrader® valve on the discharge or suction service valve.
- Encapsulated, automatic reset, high pressure control, and an adjustable low pressure control with flexible refrigerant hose to reduce possibility for leaks.
- A helix tube in tube water-cooled condenser is standard with refrigerant counter flow for optimum condensing unit efficiency.
- Every unit is put into a vacuum and subjected to a rigorous leak test. This results in a clean, dry and leak free unit every time.
- Electrical circuits are factory tested for functional integrity.
- Every unit is run tested and cycled on both the high and low pressure controls.

Option

- Sight glass (optional) is easily viewable from the front to monitor the refrigerant charge.
- Factory-installed suction filter available as option for additional system protection.

APPLICATION DATA - HWN & ZWN

Installation Precautions

All units are factory charged with dry nitrogen which must be evacuated prior to installation.

Water valves must be adjusted during initial start-up to design condensing pressure for the selected refrigerant.

All HW "X6" models require a suction accumulator. HW "X6" models with RS compressors are not suitable for R-507.

Retrofit Installations

If a P.O.E. model is used in a retrofit, the old mineral oil must be completely removed from the system or at least reduced to no more than 5% of the total oil charge. Polyolester oil is very hygroscopic. Take extra precautions to limit exposure to the atmosphere.

Leveling Units

Unit must be level to insure proper oil return to the compressor.

Condenser Water Temperature

Maximum leaving water temperature is 105°F on all models.

Condenser Water Treatment

The use of untreated or improperly treated water may result in scaling premature erosion or corrosion. A qualified water treatment specialist is recommended for proper results.

Engineering Aids

Total Heat of Rejection (THR) all units:
 $THR = BTUH + (KW \times 1000 \times 3.4 \times 1.0)$

Water Temperature Rise (ΔT_w) through
water cooled condenser:
 $\Delta T_w = THR \div (GPM \times 60 \times 8.4)$

SPECIFICATIONS & OPTIONS - HWN & ZWN

Features & Specifications	HW	ZW
Compressor mounting (rubber grommets)	Standard	Standard
Compressor discharge service valve (in line brass base valve)	Standard	Standard
Compressor suction service valve - rotolock	Standard	Standard
Large capacity refrigerant receiver (up to 100 ft. runs)	Standard	Standard
Receiver service valve (located on outlet)	Standard	Standard
Coaxial condenser (counterflow tube in tube)	Standard	Standard
Extra large electric box (encloses all options and capacitors)	Standard	Standard
Electric conduit (UL recognized, high impact, flame retardant copolymer)	Standard	Standard
Low pressure control switch (adjustable)	Standard	Standard
High pressure encapsulated safety switch (fixed)	Standard	Standard
Super hose on low pressure control (higher leak resistance)	Standard	Standard
Voltage 208-230 - 1ph - 60hz	Standard	Standard
Voltage 208-230 -3ph - 60hz	Standard	Standard
Voltage 460 - 3ph - 60hz	Standard	Standard
Pump down control switch (pre-wired)	Standard	Standard
Water valve (mounted on condenser inlet)	Standard	Standard
Agency approvals UL, ULC	Standard	Standard
Electrical Options	HW	ZW
Air defrost timer	Option	Option
Electric defrost timer	Option	Option
Electric defrost timer with contactor	Option	Option
Compressor crankcase heater ¹	Option	Option
Beacon II™ Control	Option	Option
Mechanical Options	HW	ZW
Liquid line drier & sight glass assembly (sweat) ²	Option	Option
Liquid line solenoid valve (230V coil)	Option	Option
Suction filter with bypass	Option	Option
Suction accumulator	Option	Option
Suction accumulator & filter	Option	Option
Two-tiered stacking rack for field assembly	Option	Option

¹ Crankcase heaters are not required for indoor operation but are included on some HW models. Field wiring is required. ZW models crankcase heaters are not available.

² Required on ZW "L6" models

The Beacon II system is a pre-assembled, factory installed refrigeration system featuring an integrated microcomputer-based electronic control board. System orders (including matching unit coolers) are now available for all HW & ZW models.

The Beacon II system replaces the expansion valve, solenoid valve, room thermostat, defrost control timer. It comes factory preset thereby eliminating all of the expensive and time consuming fine tuning and adjustments necessary for a good system installation. For additional information, see the Beacon II bulletin or contact your local Sales Representative.

⁺ Consult Factory for 50 hz applications

RLA values have been calculated by dividing the maximum continuous current (MCC) by 1.56, per UL and National Electrical Code Standard.

RLA = Rated Load Amps

MCA = Minimum Circuit Ampacity

LRA = Locked Rotor Amps

MOPD = Maximum Overload Protection Device

⁺ Consult Factory for 50 hz applications

RLA values have been calculated by dividing the maximum continuous current (MCC) by 1.56, per UL and National Electrical Code Standard.

RLA = Rated Load Amps

LRA = Locked Rotor Amps

MCA = Minimum Circuit Ampacity

MOPD = Maximum Overload Protection Device

FEATURES & BENEFITS - SWN MODELS

The indoor SWN water-cooled condensing unit is specifically designed for use in supermarket, restaurant, warehouse and other commercial and industrial applications. The design focuses on ease of installation and maintenance along with the flexibility to fit most application requirements.

Construction

- Spacious, pre-painted electrical box
- Fixed low pressure switch (adjustable on low temp models)
- Fixed high pressure switch
- Pump down switch
- 230V control circuit transformer on 460V units
- Standard 16-3/4" tall box - (large 29 - 1/4" tall box is standard when defrost components are selected)
- Sealed liquid line filter drier and sight glass

Serviceability

- Easy access refrigerant piping
- Captive door fasteners
- Single electrical connection location
- Removable electrical box provides convenient front access to the oil pump and compressor
- Shell and tube cleanable condenser with outlet shut-off valve, charging port and pressure relief device

Quality

- Pre-bent tubing reduces the possibility of leaks
- Shipped with dry nitrogen charge
- Heavy duty base plate
- Non-metallic conduit on all wiring runs

Components

- Semi-hermetic reciprocating compressors
- Compressor contactor and control circuit fusing
- Oil pressure switch (when required)
- Rigid mounted compressors (models 0075-0400)
- Spring mounted compressors with suction and discharge vibration eliminators (models 0499 and above)
- Compressor head cooling fan or water jacket (when required)
- Compressor solid state protection model (on units with 4D compressors)

NOTE: SWN pictured with optional replaceable core
liquid filter, oil separator, replaceable core
suction filter and liquid solenoid valve

OPTIONS - SWN MODELS

Factory-Installed Options

Dual pressure switch

Oil separator with discharge check valve and oil return hand valve

Compressor and control circuit breaker

Two tier rack

Suction accumulator

Sealed suction filter

Replaceable core suction filter (0300-2200)

Replaceable core liquid filter (0300-2200)

Liquid line solenoid valve

Spring mounted compressors with suction and discharge vibration eliminators (models 0075 to 0400)

Water regulating valve (shipped loose)

Crankcase heater

Air defrost timer

Electric defrost kit. Kit includes timer, evaporator fan contactor, defrost heater contactor(s), lockout relay and terminal block

Remote load fusing for electric defrost kit. Includes evaporator fan motor and defrost heater fuses

Beacon II™ compatible (contact factory)

NOTES: Condenser refrigerant holding capacity refers to the weight of the type of refrigerant indicated by the model number (i.e. M6, L6, E6 = R-404A/R-507)

Dimensions are maximum dimensions with options. Please refer to submittal drawings for specific model dimensions
