FEATURES & BENEFITS

BETTER PERFORMANCE

- Enhanced grill design gives 25% to 40% increase in free-air area
- Electrical box located out of air stream
- Vertical receiver needs less refrigerant for liquid seal

FASTER ACCESS

- Base valve and high & low pressure taps on outside of unit
- Removable grill for access to all serviceable parts
- Improved access to fan motors & components
- Lighter, one-piece top
- Easy-to-view sight glass location

EASIER SERVICE

- Better access to components for easier repair
- Compact design allows for better jobsite placement & installation
- Dual isolation valves on receiver

GREATER RELIABILITY

- Floating Tube™ coil design eliminates tube-sheet leaks
- Pre-bent tubing reduces mechanical joints
- State-of-the-art factory leak-detection ensures highest quality

OUTSTANDING FEATURES

NOMENCLATURE

FACTORY INSTALLED: PREFERRED OPTION PACKAGES

Please see Price Book or The HUB for availability

Option Code	Description (All Preferred Options include Standard Base +)
A0100	Defrost Timer – Air
A0300	Defrost Timer - Contactor
A0302	Defrost Timer - Contactor Low Amps
A0303	Defrost Timer - Contactor High Amps
A0400	intelliGen™ / Beacon II
A1002	Replaceable Core Filter-Accumulator + Liquid Standard + Replaceable Core Filter Drier

STANDARD FEATURES

ServiceMate™ Diagnostic Module

Manual Pump Down Switch

Electronic Oil Failure Switch (Discus™ Compressors Only)

Fixed Head Pressure Control Valve (C4 & C5 cabinets only)

- Low temp - Revision A 100 psi • Med. temp - Revision A 145 psi
- Low temp - Revision B 145 psi

Adjustable Head Pressure Control Valve (C6 cabinet only)

Spring Mounted Compressors with Suction and Discharge Vibration Eliminators (Discus™ and Bitzer Compressors only)

Crank Case Heater

Adjustable Low Pressure Control

Fixed High Pressure Control

Liquid Line Sight Glass

Permanent Liquid Line Filter

Outdoor Painted Cabinet

Floating Tube™ Design

ELECTRICAL OPTIONS

Smart Defrost Kit™ (SDK)

Crankcase Heater on Indoor Units

Fan cycling

Defrost Timer for Air Defrost

Defrost Timer and Contactor for Electric Defrost (C6 cabinet includes evaporator sub fusing as standard in kit)

intelliGen™/Beacon II™ Kits (see intelliGen™/Beacon II™ section for details)

Electric Defrost Fusing (includes evaporator fan fusing on C4 and C5 cabinets)

Dual-Pressure Control*

Adjustable High Pressure Control with Manual Reset*

Phase-Loss Monitor*

Compressor Fusing*

Circuit Breaker Circuit Protection for Compressor, Condenser Fan and Control Circuit*

MECHANICAL OPTIONS

Adjustable Head Pressure Valve

Head Pressure Valve on Indoor Units

Mounted Liquid Line Solenoid Valve

Replaceable Core Liquid Line Filter/Drier

Permanent Suction Line Filter

Replaceable Core Suction Line Filter

Suction Accumulator

Oil Separator

Bohnguard™ Fin Protection

Copper Finned Coil

Oversized Receiver

Slanted Louver for Snowbelt Regions (not available with indoor unit)

12" Extended Legs for Snowbelt Regions

Hail Guards

Standard receiver with low ambient kit (heated/insulated receiver & low pressure bypass time delay relay)

NEMA contactors*

Compressor Unloading (one step)*

* Available on C6 cabinet only

PERFORMANCE DATA – R-404A/R-507A

Medium Temperature Models - Scroll Compressors

@ C = 208-230/3/60, D = 460/3/60, E = 575/3/60

[†] Estimated sound pressure values are 10 feet from the unit. For estimating sound pressure from the unit at different distances, deduct the following from the unit values: 20 feet, deduct 6 dBA; for 40 feet, deduct 12 dBA; for 80 feet, deduct 18 dBA. This data is typical of "free field" conditions for horizontal air cooled condensing units at the outlet of the discharge air. The actual sound measurements may vary depending on the condensing unit installation. Factors such as reflecting walls, background noise and mounting conditions may have a significant influence on this data.

[†] Estimated sound pressure values are 10 feet from the unit. For estimating sound pressure from the unit at different distances, deduct the following from the unit values: 20 feet, deduct 6 dBA; for 40 feet, deduct 12 dBA; for 80 feet, deduct 18 dBA. This data is typical of "free field" conditions for horizontal air cooled condensing units at the outlet of the discharge air. The actual sound measurements may vary depending on the condensing unit installation. Factors such as reflecting walls, background noise and mounting conditions may have a significant influence on this data.

Notes:

* H = Outdoor, N = Indoor

Per UL and NEC, RLA values have been calculated by dividing the Maximum Continuous Current (MCC) by 1.56.

[†] Unless otherwise noted, model is available for 50 Hz. Consult factory for details.

[‡] = Number of defrost heater contactors in parentheses

[^] = Two fan large units have ability for a reduced amp electric defrost kit (low amps). Confirm proper defrost kit prior to ordering or installing.

Notes:

* H = Outdoor, N = Indoor models only available as model Rev A

Per UL and NEC, RLA values have been calculated by dividing the Maximum Continuous Current (MCC) by 1.56.

† Unless otherwise noted, model is available for 50 Hz. Consult factory for details.

‡ = Number of defrost heater contactors in parentheses

^ = Two fan large units have ability for a reduced amp electric defrost kit (low amps). Confirm proper defrost kit prior to ordering or installing.

AWEF DATA – MEDIUM TEMPERATURE

Discus™ Compressor Models - Indoor/Outdoor

If model has a numerical value in the table below, the following statement applies:

This refrigeration system is designed and certified for use in walk-in cooler applications

[†] Estimated sound pressure values are 10 feet from the unit. For estimating sound pressure from the unit at different distances, deduct the following from the unit values: 20 feet, deduct 6 dBA; for 40 feet, deduct 12 dBA; for 80 feet, deduct 18 dBA. This data is typical of "free field" conditions for horizontal air cooled condensing units at the outlet of the discharge air. The actual sound measurements may vary depending on the condensing unit installation. Factors such as reflecting walls, background noise and mounting conditions may have a significant influence on this data.

Notes:

* H = Outdoor, N = Indoor

Per UL and NEC, RLA values have been calculated by dividing the Maximum Continuous Current (MCC) by 1.56.

† Unless otherwise noted, model is available for 50 Hz. Consult factory for details.

Notes:

* H = Outdoor, N = Indoor

X = model not suitable for this refrigerant

— = model is not DOE AWEF compliant

If model has a numerical value in the table, the following statement applies. “This refrigeration system is designed and certified for use in walk-in freezer applications.”
